Experience

CCI ICT Innovations — Beirut, Lebanon
Data Analyst, Full-time — *Nov. 2024 – Present*

- Converted and optimized 60+ Tableau dashboards to Power BI within a 200+ dashboard migration program, rebuilding data models, DAX measures and row-level security.
- Build Power BI dashboards and Microsoft Fabric data models for public-sector and institutional clients, defining KPIs with client stakeholders.
- Developed dashboards for public-sector institutions to monitor program performance and stakeholder engagement.
- Built analytics for a national cultural organization covering user engagement, event attendance and resource utilization.
- Delivered a Power Apps sales reporting app to production across four companies, with 240+ sales meeting reports logged.
- Built a Copilot Studio AI agent demo for an industrial maintenance use case, verified by 200+ automated tests.

ITCAN Solutions — Saida, Lebanon
Information Management Engineer, Full-time — *Feb. 2024 – Oct. 2024*

- Configured and maintained gateways and enterprise applications.
- Built automation enhancements and custom solutions for operational needs.
- Extracted and transformed operational data to support business processes and decisions.

Maids.cc — Dubai, UAE (Remote)
Data Analyst, Full-time — *Sept. 2023 – Feb. 2024*

- Wrote MySQL queries with joins, subqueries and conditional logic to extract and transform operational data.
- Built Tableau reports and analyses used for operational decision-making.

Projects

Service Desk Analytics — Power BI, Microsoft Fabric

- Designed executive and operational dashboards for four public-sector service desks on one Microsoft Fabric data model, with 55 DAX measures for SLA compliance, backlog and resolution time.
- Built 12 custom visuals for the report, with one KPI framework shared by all four service desks.

Operations Dashboard with Row-Level Security — Power BI, Power BI Embedded

- Built a 10-page report with 70+ measures for orders, SLA compliance, stock and consumption across 100+ sites, with row-level security limiting each user to their own sites.
- Replaced per-supervisor security roles with one dynamic role driven by a supervisor-to-site mapping table.

Multi-Company Sales Management App — Power Apps, Dataverse, Power Automate

- Built an app for sales teams to log client meetings and track weekly KPI targets, with automated weekly Excel reports to managers and midweek target alerts.
- Set up four access roles (salesperson, manager, read-only coordinator, administrator) enforced in Dataverse security.

Industrial Maintenance AI Agent — Copilot Studio, Power Apps, Fabric KQL

- Built a customer demo on synthetic data in which an AI agent investigates equipment faults from sensor data, drafts maintenance work packs and routes them for approval.

Enterprise Operations Platform — React, ASP.NET Core, Dataverse, Azure

- Contributed to an internal platform integrating presales, pricing, projects, certifications and approvals, with access control for five user roles.

Education

Rafik Hariri University — Mechref, Lebanon
Bachelor of Business Administration in Information Technology Management — *Sept. 2020 – May 2023*

Technical Skills

Certification: Microsoft Certified: Fabric Analytics Engineer Associate (DP-600), 2025
